## Restore Points

Keep in mind that Restore Points are not a substitute for the regular backup routine.

### Table of Contents

Create a Restore Point.....	3
Restoring to a Restore Point.....	4

Click on “Restore Points” from the Main Menu and the following window will appear:

# Utility Billing

- 1. Create a restore point?:** Click “Create a restore point?” if you want to create a restore point and backup all of your NEMRC data for this module.
- 2. Restore back to a previous restore point?:** Click “Restore back to a previous restore point?” if you want to revert all of your data back to a restore point. In doing so you will lose anything that was modified or created after the restore point was made.
- 3. Cancel:** Click “Cancel” to return to the Main Menu.

# Utility Billing

## Create a Restore Point

If you choose “Create a restore point?” the following window will appear:

The screenshot shows a window titled "NEMRC Restore Points" with a blue header bar. Inside the window, there is a text input field with the label "Name your restore point then click CREATE" and a red "1" next to it. Below the input field are two buttons: "CREATE" with a red "2" and "Cancel" with a red "3".

- 1. Name:** Type in a name for this restore point.
- 2. Create:** Click “Create” to create this restore point. It will take a few moments, and you will be notified upon successful creation. You will be returned to the Main Menu.
- 3. Cancel:** Click “Cancel” to return to the previous window.

## Restoring to a Restore Point

If you choose “Restore back to a previous restore point?” the following window will appear:

1. Either by clicking, or using the arrow keys, select the restore point you want to restore to.
2. **Restore to selected point:** Click “Restore to selected point” to restore your data to the selected restore point. You will LOSE ALL DATA that was changed/added after this restore point was created. You will be prompted for a password; call NEMRC support for this password.
3. **Cancel:** Click “Cancel” to cancel and return to the previous window.
